ROLLER
SHADES

ROLLER & SOLAR SHADES

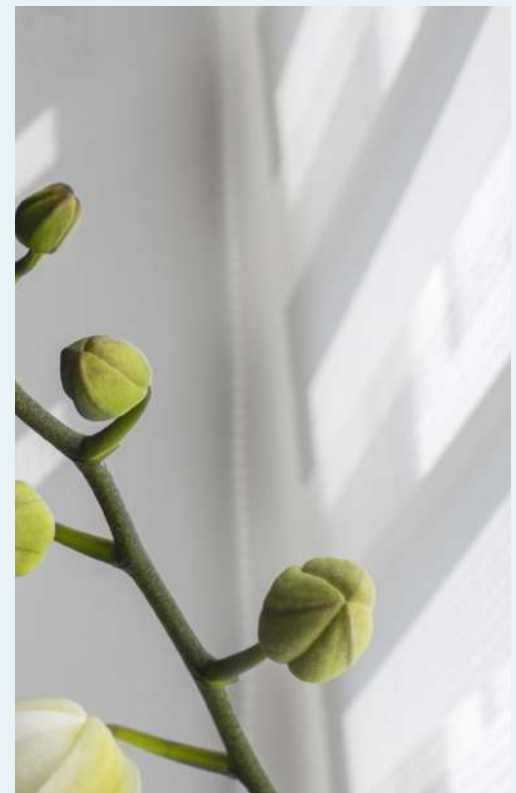

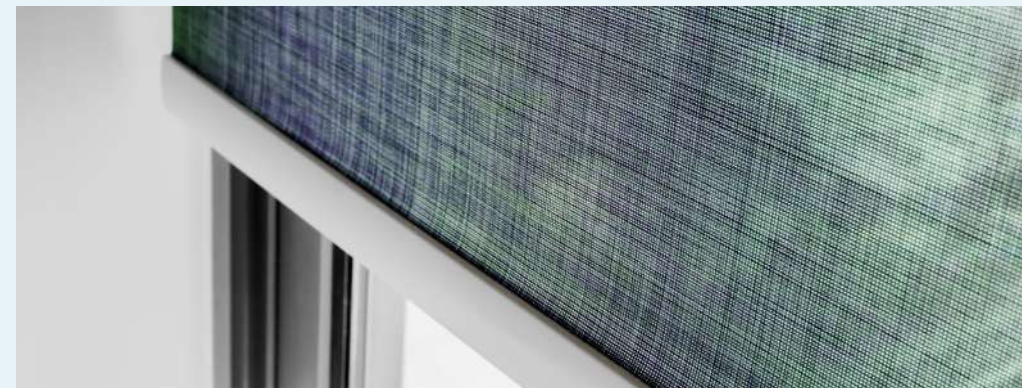

**THIS PURPOSE-BUILT
WINDOW TREATMENT
CAN LOOK GREAT IN
FORMAL, MODERN OR
UTILITARIAN USES.**

Roller shades bring a very simple but modern style to your rooms. With their low profile, roller shades are an effective window treatment for reducing or blocking light, all without taking up a lot of room.

Blackout Shades block light from entering the room. Made with an opaque fabric, these allow virtually no light through, and for those installs that demand no light at all, you can also order guides and channels for your new roller shades to also block any light from leaking through the sides!

Solar Shades go perfectly in a room that would benefit from basking in the sun's warmth while also reducing glare. Using a looser weave, solar shades enable the majority of light to pass through, while reducing the visual harshness of the sun's direct rays.

Fiber Contract also offers several customization options for the hardware, such as motorized roller shades, and integration with smart devices, enabling roller shades to be a great choice even when installed in multi-story spaces!

ROLLER HARDWARE

WE DON'T JUST SIMPLY SUPPLY THE FABRICS, HERE WE HAVE ALL THE HARDWARE OUR COMPANY IS ABLE TO SUPPLY TO YOU TO AID IN PROPER INSTALLATION AND EXECUTION. FROM CHAINS AND BATONS, TO THE BRACKETS AND ROLLERS THEMSELVES THAT HOUSE THE FABRICS.

BRACKETS 1

THESE BRACKETS WILL HOLD THE HARDWARE THAT ATTACHES TO YOUR ROLLER FABRIC, THESE WILL BE SCREWED ON TO THE INSET OF YOUR WINDOW FRAME FIRST. THEN YOUR ROLLER SHADE WILL BE CLIPPED IN.

ROLLER COGS 2

THESE ARE THE PIECES OF HARDWARE THAT ATTACH DIRECTLY INTO YOUR ROLLER SHADE ROLL. THIS IS ALSO WHERE YOUR CHAIN OR BATON IS GOING TO OPERATE THE RAISING AND LOWERING OF YOUR SHADES.

CHAINS 3

LASTLY, THIS CONTROLS THE OPERATION OF YOUR WINDOW TREATMENTS. CHAINS CAN EITHER BE PLASTIC OR METAL (AS PICTURED) AND CAN COME IN DIFFERENT COLORS TO FIT THE AESTHETICS YOU'RE AFTER.

DRAPERY SPECIFICATION FORM

PLEASE USE ONE FORM FOR EACH DRAPERY TREATMENT

SPECIFICATION NOTES

1. All measurements to be confirmed during field measure, prior to fabrication
2. Vertical pattern match where seams are necessary
3. Side hem to be 1-1/2" wide, double turned blind stitched. (straight stitched if printed or stand alone blackout)
4. Bottom hem of blackout drapery is 4" double turned hem
5. Bottom hem of sheer includes weights or beaded chain weight, stitched into place to prevent slippage, and to be fully concealed.
6. All traversing drapery to have clear acrylic 1/2" diameter batons for hand drawn operation. Baton to be attached to face of drapery affixed to lead carrier through grommet. 36" minimum length. Bottom edge of baton to be 60" aff for typical rooms.
7. For accessible rooms: baton described in line 6 shall have loop handle with a bottom reachable height at 48" aff.
8. Any value engineering substitutions must be submitted to designer for review and approval.

NOTES

[illegible]
