DRAPERY

DRAPERY

From simple, to exquisite and stunning, Fiber Contract's drapery will add a wonderful flair to your rooms. We have a wide array of styles, weights, mounting options, and more available to fit any design vision.

WHEN YOU'RE LOOKING TO ADD A TOUCH OF ELEGANT SOFTNESS TO YOUR ROOM.

When trying to choose the best drapery for your space's intents and purposes, there are several factors to consider. All of which we can help you navigate! For example, heavier fabric performs an excellent job at dampening sound in a room, allowing you and your guests to sleep peacefully. Lighter drapery, on the other hand, allows light in to brighten a dark room.

Drapery's installation flexibility also allows you to install more than just one set of drapes as well. You could simply use a sheer drape which would allow light to softly fill the room with light. Or you can add a second set of drapes in the form of a blackout in front of your sheers if you so choose to have the option to completely block light out.

Fiber Contract also allows for comprehensive customization options for your drapery too. Perhaps you would prefer a simple flat panel look, or pinched pleats? How about wool instead of cotton? You dream it, we make it!
